HEALMAX®: FAST RESULTS WITHOUT FORMALDEHYDE

"A GREAT HOOF PRODUCT"

"We were having problems in winter with hoof baths freezing and products not working well at cold temperatures. Since switching to HEALMAX® Foam, we've got our hairy heel wart problem well under control without dangerous formaldehyde fumes. The hoof trimmer says he can tell it's working!"

Mike Berwald,

HEALMAX® Spray

A fast-acting topical antiseptic that clings to the problem area.

HEALMAX® Spray is designed for easy spot application.

- Special gel formulation adheres to the area that needs attention.
- Requires just one or two applications, on the same day or consecutive days.
- Provides exceptional results without dangerous formaldehyde.
- For operations using footbaths, HEALMAX® Spray can also be used for severe cases that require extra attention.

HEALMAX® Foam

An economical application method for the entire herd.

HEALMAX® Foam is ideal for whole-herd application of milking cows, dry cows and heifers, or anytime the footbath can't be used.

- Easy to apply.
- Use in the parlor for milking cows to provide visible coverage and additional contact time where it is needed most.
- For dry cows and heifers, can be applied during feeding with animals in headlocks.

HEALMAX® Paste

HEALMAX® Paste is a unique formulation, **designed for hoof-trimmers**, containing HEALMAX® in a water-proof paste that simplifies handling and ensures contact.
