

BovaPro

IODINE CONCENTRATES

IoPlex

BovaPro Iodine Concentrates are formulated using our proprietary IoPlex process, which provides a steady and stable supply of free iodine. The concentrates are designed to provide a quick kill while remaining gentle on teat skin, and they offer a long shelf life.

Ready to blend concentrates

BovaPro Iodine Concentrates are formulated using our proprietary IoPlex process, which provides a steady and stable supply of free iodine. The concentrates are designed to provide a quick kill while remaining gentle on teat skin, and they offer a long shelf life.

- **Simply mix with water** for a finished product with iodine concentrations of 0.25 to 1.0%, and emollients from 2.0 to 10.0%.
- **Formulated without NPEs**, which are known endocrine-disrupting surfactants.
- **Withstands freeze/thaw cycles** without the loss or fall-out of iodine.
- **Mixing ratio:** 1:x, one part concentrate, x parts water. Always add concentrate to water.

BovaPro Iodine Concentrates

BovaPro 102 Concentrate (1:7)

8273C 55 gal
8274C 265 gal
